

STATE OF NORTH CAROLINA  
**GOVERNOR PAT McCrORY**

*FACTSHEET*

**Project Phoenix**

*Many of our State's buildings are in horrible condition, as [outlined by the Raleigh News & Observer](#) after a tour with Governor Pat McCrory.*

**An End to the Culture of Neglect and Apathy:**

- Employees “didn’t know” why two fountains in front of the Capitol were broken and filled with dirty water and garbage. It was the status quo and Governor McCrory initiated a stop to this type of culture of neglect on day one.
- However, too many state buildings are replete with:
- HVAC units are in a state of disrepair.
- There are broken elevators.
- There is asbestos insulation.

**Project Phoenix:**

- Governor McCrory will submit to the General Assembly a \$1.2 to \$1.4 billion dollar general bond proposal.
- Money will be used to revitalize buildings that can be saved and tear down those that can't.
- State government will become points of pride in our communities, not blemishes.
- Project Phoenix will save taxpayer money, increase workplace safety and increase productivity.
